JULY 2023 - JANUARY 2024

+ PROJECT SIZE

12,784 SF

+ COMPONENTS

- Ground up
- Off & On-Site Development
- 2-Story Steel Building
- Kitchen, Bars, Retail
- 36-Hole Putting Course

+ PROJECT OVERVIEW

Harris Associates was selected by PopStroke Entertainment Group as the general contractor for the ground-up construction of a 36-hole, high-end putting course facility. The project scope included the erection of a two-story structural steel building designed to house two full-service bars, a commercial-grade kitchen, and dedicated retail spaces. In addition, the project involved construction of a separate standalone structure for storage and a trash enclosure.

Site development work encompassed both on-site and off-site improvements, including mass grading, site preparation, utility installation, drainage systems, and paving. The putting courses were constructed using a fully synthetic turf system, complete with engineered sub-grades and integrated features such as fairways, bunkers, and rough areas to replicate traditional golf course conditions. Work also included hardscape elements, landscaping, walkways, and coordination of all associated civil and architectural components to deliver a fully operational, high-end recreational facility.
